

Press Release:

AET releases SafeSign IC Enabler for BlackBerry

Strong authentication and secure email for your PDA

BlackBerry

BlackBerry® devices are becoming ubiquitous throughout the enterprise, as organizations improve employee connectivity and communications. The BlackBerry® Enterprise Solution—designed and manufactured by Research In Motion (RIM)—is a flexible, IT-friendly solution that provides mobile users with secure wireless access to their enterprise email and critical business applications.

The BlackBerry Enterprise Solution can be augmented with two-factor authentication and secure email using smart cards. Through a combination of security services and the use of digital certificates the BlackBerry security architecture helps protect critical business data and systems from threats by offering strong authentication, encryption and digital signatures. These digital certificates should be stored on a secure removable device like a smart card or microSD card, to prevent identity theft and misuse of the certificate.

SafeSign IC Enabler for BlackBerry

“SafeSign IC Enabler for BlackBerry adds to the BlackBerry the security level you need as an executive without compromising the comfort you expect from your BlackBerry device”, according to Jan RoCHAT, CTO of A.E.T. Europe B.V. “SafeSign Identity Client (IC) Enabler for BlackBerry offers a solution for securely using your smart card with digital certificate on your BlackBerry device. It supports all certificate enabled applications like User authentication, Device access and Email & file signing and encryption.”

SafeSign IC Enabler for BlackBerry supports the use of Java Card compliant cards like HID Crescendo and Advanced Security SD (ASSD) cards like the Mobile Security Card microSD on BlackBerry OS 4.5+ and 5.

Together with the SafeSign IC software for Windows, Linux, MAC OS X and other platforms, and a range of SafeSign IC enablers, SafeSign IC supports multiple tokens on multiple platforms and multiple devices for over 17 million users worldwide.

About AET

The Dutch company A.E.T. Europe B.V. (AET), headquartered in Arnhem and founded in 1998, is committed to IT security. AET offers its customers ingenious solutions based on worldwide accepted standards for e-commerce and information security.

AET is setting new standards in the crucial business area of developing middleware for smart cards and USB tokens with its **SafeSign Identity Client**. Another one of AET's bestsellers is **BlueX Digital ID Management**. This well-known and extremely adaptable system supports the simplification and automation of individual steps for the digital ID management process.

AET is a BlackBerry Alliance partner.
