ConsentID
Identity Provider

Digital Signature,
Authentication and
Digital Consent
on your **mobile.**
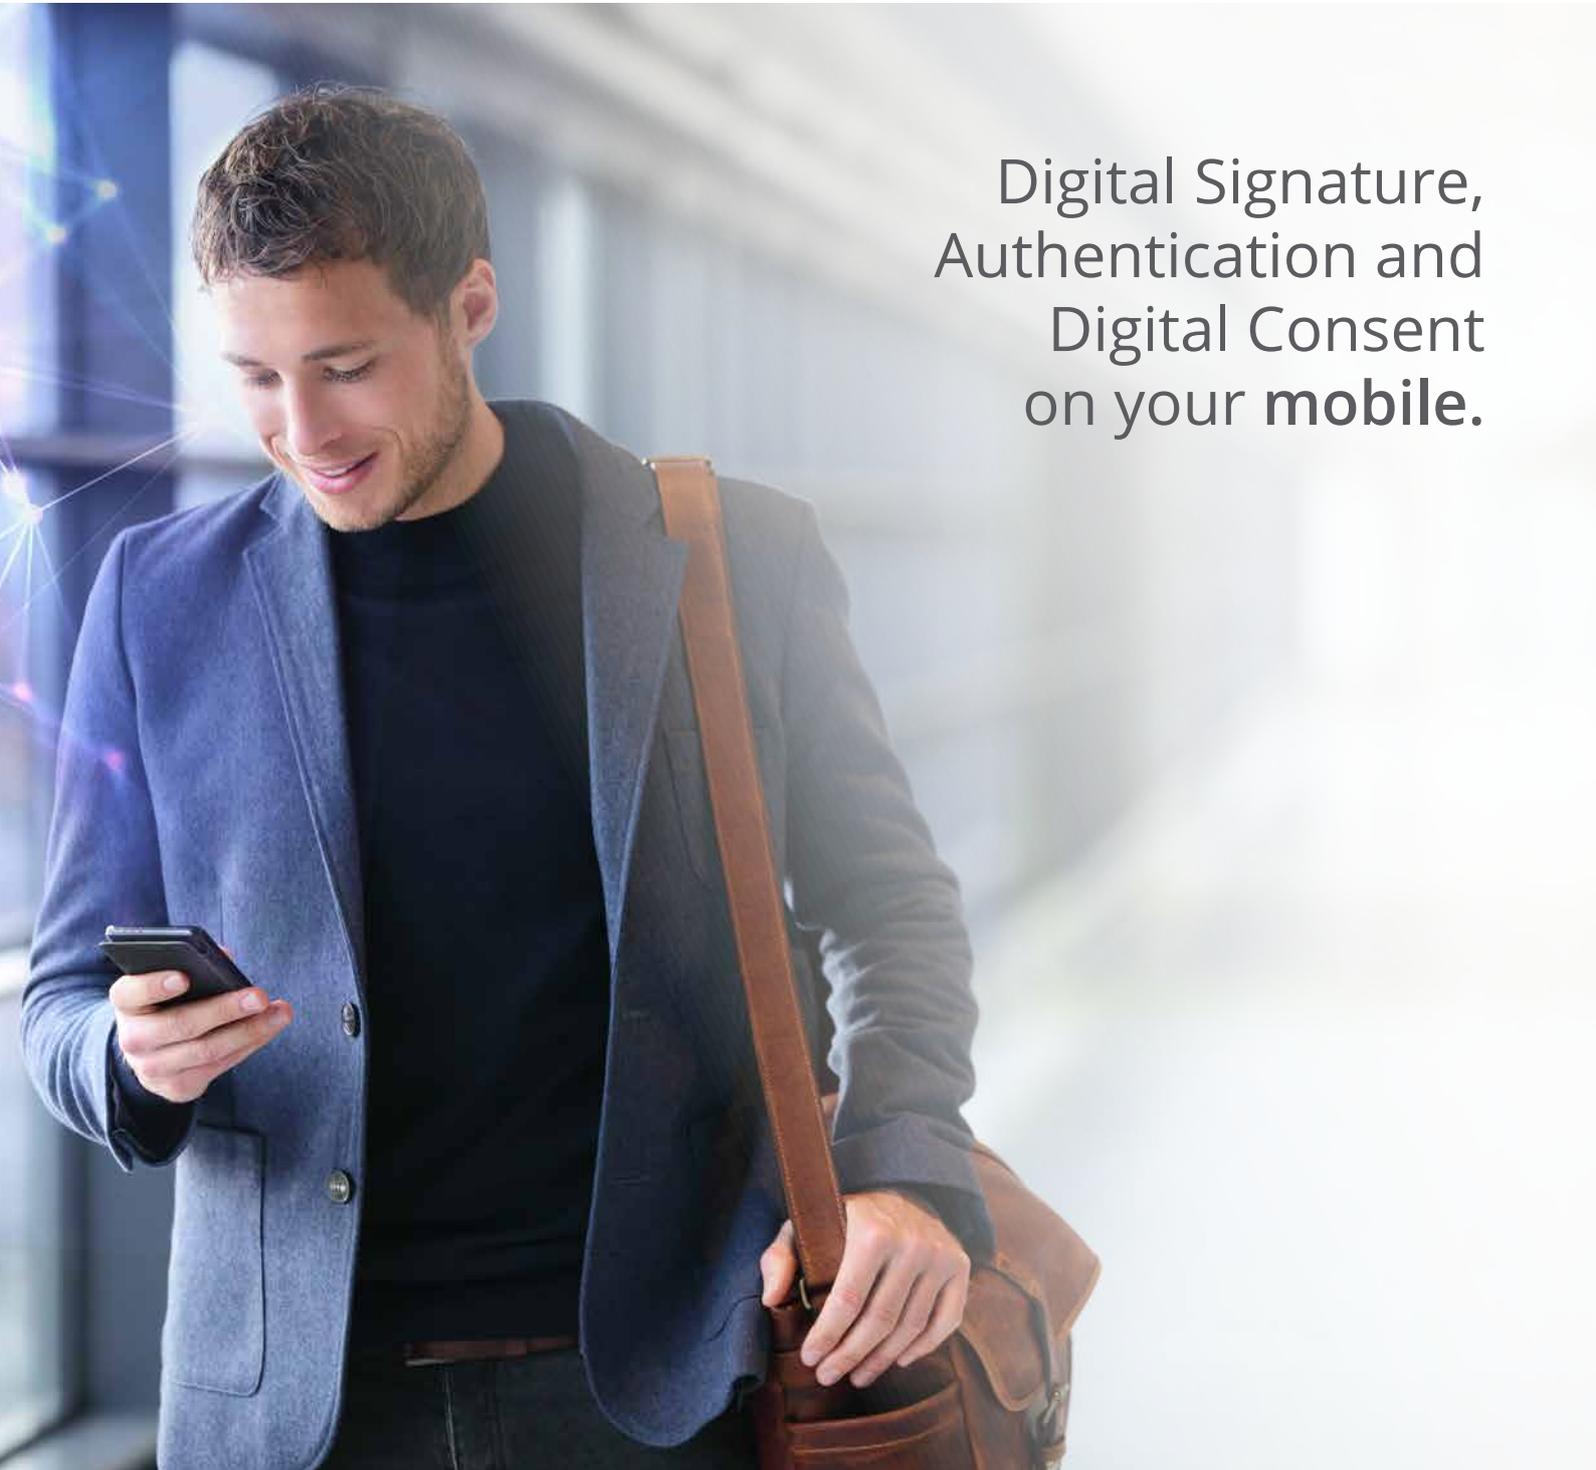

ConsentID, AET's solution, is based on digital certificates technology, providing trust and credibility to digital transactions. It performs transactions with absolute security in an easy way. You can digitally sign documents without paper or pen, saving time and money. Assuring users identity by providing authentication and secure access to customers, employees and citizens.

ConsentID operates in the area of digital signatures and identity management within the parameters of eIDAS. By following these European standards, digital signatures have a legal value, protecting both parties of a contract. It is a unique solution that works with digital certificates on your mobile device. It does not require plug-ins or complex passwords. You can use ConsentID on any device: mobile, tablet or desktop and different operating systems.

Available on: App Store   Google Play

Benefits

Users

Convenience
You can be on a holiday, at a business meeting or on the road.

Comfort
Through personal devices without additional equipment.

Compatibility
It works on smart phones, tablets, and desktops. Compatible with operating systems iOS, Android and Windows 10.

Organizations

Cost-savings
Saving cost in your back office (supporting help desk calls for browser issues, java plugins problems or passwords), frequent administrative actions (notary, courier) and purchase of hardware (tokens, OTP or smart cards).

Solution to Java issues
The main browsers will discontinue Java browser plugins by the end of 2016. ConsentID App for Windows ensures business continuity within your environment.

Sustainability
A paperless solution supporting business processes. ConsentID is flexible and scalable.

Integration

With ConsentID

Quick implementation
