

## Team lead Testing & Support (Arnhem)

Are you up for a new challenge in the field of Quality Assurance? Have you ever thought of being the captain of a team of software testing professionals? Do you have the drive to move and progress with the rest of the organization? And still looking for a position where you can combine a helicopter view with some hands-on testing activities?

Then you might just be the Team lead Testing & Support that we are looking for!

Advanced Encryption Technology (AET) Europe uses cutting edge technology to create solutions for secure authentication, authorization and information exchange. Our products are used to secure information for government, healthcare and private companies all over the world. Currently AET is expanding into new markets and therefore needs extra manpower rapidly.

### *Your opportunity as the Team lead Testing & Support*

By joining our Testing & Support team, which is located in Arnhem (NL), you will be part of the beating heart of our organization. You will be responsible for driving and establishing QA and (3<sup>rd</sup> line) support processes and strategy within the team. You will also coach team members on quality practices and frameworks and use your proven communication skills to liaise with your team and other departments involved.

### *Your profile*

As our **Team lead Testing & Support** you are dedicated (like us) to information security. You are a leader by nature and have excellent coordinating skills, but also enjoy overall team and people management.

With your strong and agreeable personality you are able to represent the interests of both your department and the individuals in your team, but you can also act as a gatekeeper when circumstances demand it.

You are comfortable with the dynamics of a growing organization and can quickly adapt to change. A professional attitude helps you to keep a cool head, even in stressful situations.

Other qualities you have:

- bachelor or master level
- several years of relevant work experience
- strong written and verbal communication skills, also in English
- excellent test management skills

# Vacancy

- strong analytical skills and technical understanding
- strong security awareness
- TMAP/ISTQB certification
- Some experience on support processes (ITIL)

## *Working at AET Europe*

Our company consists of about 50 employees worldwide who work together to make a success of our state-of-the-art security solutions. The international character of our company is reflected in its staff, with specialists from several countries over Europe. Our attitude is informal and everyone is stimulated to get the best out of him or her self. We highly appreciate people who bring their own ideas and make them happen.

*In the context of the integrity and reliability of our staff, we may conduct a security screening during the application process. Therefore, we seek only candidates with the **EUROPEAN NATIONALITY**.*

## **We look forward to meeting you!**

If you are interested in this opportunity and feel that you have the relevant skills, qualifications and experience, please send your letter **WRITTEN IN ENGLISH** and your resume to [recruitment@aeteurope.com](mailto:recruitment@aeteurope.com)

## *Need more info?*

We can understand you want to know more about the job. Don't hesitate to give us a call on: +31 26 365 3350. Ask for Bert.

## Part of the AET Philosophy

No matter who you are or what you do; there is always a specific world you want, or need to access. AET makes this possible by creating the perfect technological solution in user identification, authentication and authorization: unlimited access, 24/7.

We do not only believe your world should be accessible anytime. We are also determined to make this access easy and secure. At a time when almost everything is digital, security has become our main focus.

By creating unlimited, secure and convenient access to your world, we ensure that you have the power to control your own world. You, and nobody else. In devising the best technological solutions, we need to be fast, smart and inventive. So that's exactly what we are. We are also passionate: about technology; about our business; about the possibility of providing convenient access to different worlds.

In our vision, everyone can benefit from the technology we offer. Because everyone deserves reliable, safe and unlimited access to the world he or she wants to enter.

Do you want to be part of this philosophy?

### **About AET**

AET Europe (Advanced Encryption Technology) is a technology company in applied crypto, which has over more than 15 years of extensive knowledge in the high-end security. We are the biggest independent cryptographic middleware specialist worldwide and therefore have a strong footprint in state-of-the-art (mobile) authentication and digital signature technology. AET is headquartered in Arnhem, the Netherlands, has subsidiaries in Portugal and Switzerland and has currently 50 employees.
