Vacancy

ConsentID Backend developer (Arnhem/Amsterdam)

Are you a versatile specialist in the area of multi-platform app development? Do you get your satisfaction from designing, writing and editing high quality software and are you not afraid to dive into technical details? Then you might just be the Backend developer that we are looking for!

Advanced Encryption Technology (AET) Europe uses cutting edge technology to create solutions for secure authentication, authorization and information exchange. Our products are used to secure information for government, healthcare and private companies all over the world. Currently AET is expanding into new markets and therefore needs extra manpower rapidly.

Your opportunity as a ConsentID Backend developer

By joining our ConsentID development team, which is located in Arnhem and Amsterdam (NL), you will be part of a versatile development team consisting of App and Backend developers. You will primarily design, write and unit test software and write developer documentation in straightforward English, using a methodical approach. Also, you will work together closely with the support team in order to analyze and resolve customer issues.

Your profile

As ConsentID Backend developer you are dedicated (like us) to information security. It is in your nature to take responsibility and ownership, and you enjoy having a say in design, development, developer documentation and tooling. A self-supporting attitude is required, proactively sourcing relevant information from the company's test engineers and software integrators.

You are a team player and are able to organize and prioritize your workload. You always strive for improvement. You have a strong and agreeable personality with great communication skills. With your professional attitude you are able to keep a cool head, even in stressful situations.

Also very important: as a significant learning curve applies to this position, you are not the type of person that is discouraged by a high degree of difficulty in your daily activities.

Other qualities you have:

- a Bachelor or Master degree in IT
- 5 years or more of programming experience in C# and .NET
- strong analytical skills and technical understanding

Vacancy

- proven excellent communication skills in English, written and verbal
- the ability to work alone and in a team
- strong security awareness

We would be happy if you have experience with and/or knowledge of:

- REST APIs
- Web technology (IIS, HTML, JavaScript)
- Databases (SQL)
- XML - Web services (SOAP)
- containerisation (Docker, Kubernetes)
- load balancers (Nginx)
- using the Atlassian tool chain
- cryptography and/or Public Key Infrastructure
- smart cards (PKCS#11)

Working at AET Europe

Our company consists of about 50 employees worldwide who work together to make a success of our state-of-the-art security solutions. The international character of our company is reflected in its staff, with specialists from several countries over Europe. Our attitude is informal and everyone is stimulated to get the best out of him or herself. We highly appreciate people who bring their own ideas and make them a reality.

In the context of the integrity and reliability of our staff, we may conduct a security screening during the application process. Therefore, we seek only candidates with EUROPEAN NATIONALITY (EU).

We look forward to meeting you!

If you are interested in this opportunity and feel that you have the relevant skills, qualifications and experience, please send your letter WRITTEN IN ENGLISH and your resume to recruitment@aeteurope.com

Part of the AET Philosophy

No matter who you are or what you do; there is always a specific world you want, or need to access. AET makes this possible by creating the perfect technological solution in user identification, authentication and authorization: unlimited access, 24/7.

We do not only believe your world should be accessible anytime. We are also determined to make this access easy and secure. At a time when almost everything is digital, security has become our main focus.

By creating unlimited, secure and convenient access to your world, we ensure that you have the power to control your own world. You, and nobody else. In devising the best technological solutions, we need to be fast, smart and inventive. So that's exactly what we are. We are also passionate: about technology; about our business; about the possibility of providing convenient access to different worlds.

In our vision, everyone can benefit from the technology we offer. Because everyone deserves reliable, safe and unlimited access to the world he or she wants to enter.

Do you want to be part of this philosophy?

About AET

AET Europe (Advanced Encryption Technology) is a technology company in applied crypto, which has over more than 20 years of extensive knowledge in the high-end security. We are the biggest independent cryptographic middleware specialist worldwide and therefore have a strong footprint in state-of-the-art (mobile) authentication and digital signature technology. AET is headquartered in Arnhem, the Netherlands, has subsidiaries in Portugal and Switzerland and currently has 50 employees.
